**Wendy (Qiwen) Ye**

**Shush Speaker**

April 15th, 2016

## About work

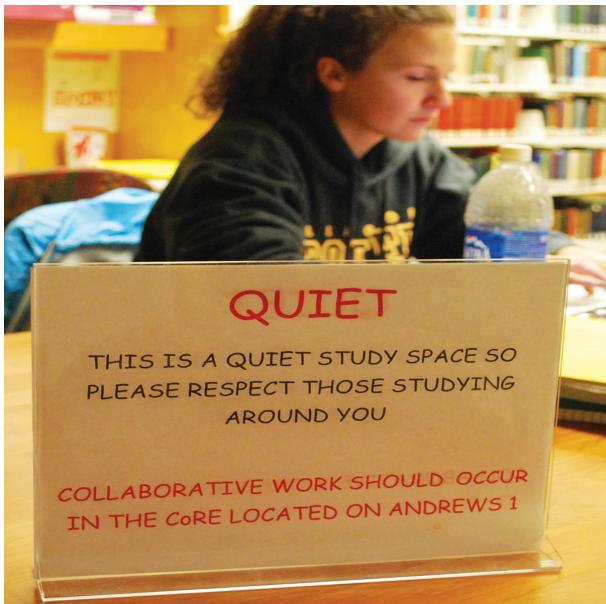

The speaker itself is mean to be use in a quiet enviornment such as the library or a studying cafe. The main purpose of the speaker is to tell people to be quiet when they are being too load. It can also be used as a regular speaker through bluetooth connection. The outer shell of the speaker is created with CNC cut out dibond and inside is programe with arduino uno.
